

Open REACH letter for Tikkurila Oy customers

TIKKURILA OY AND REACH -REGULATION

Tikkurila Oy is committed to fulfil its duties regarding the REACH regulation.

Regarding the use of the substances in our products, Tikkurila is in a position of a downstream user and we have no obligation to preregister or register the substances included in the rawmaterials which we use.

Manufacturers and importers of the substances have the obligation to preregister and later register the substances. We expect that our rawmaterial suppliers have made the preregistrations and the registrations of the substances included in the rawmaterials which we use in our products.

We have had intensive discussions with our suppliers concerning the pre-registration and the registration of substances included in the rawmaterials which we use to ensure the availability in the future.

For the moment we assume that the products which we supply from our present product range remain available also in the future. Should there be any changes coming from the rawmaterial supplier side, we will contact you immediately.

Regards

Anu Passinen
Head of the Department / Information and research services
Tikkurila Oy
